

# 3Dee Active Office Chair

The new 3Dee office chair brings dynamism, health and quality of life into the office. Developed and produced in Germany by Aeris GmbH.

It combines active-dynamic sitting with ergonomically optimized relaxation. The patented technology swopper® supports and encourages natural motion in three dimensions. It makes movements to the side, front and back and vertical swing possible.

Active: Dynamic seating brings better circulation, improved mood swings and improves productivity, plus frequent change of posture and exercise to strengthen the back and the muscles.

Relaxing: The physiologically arching of the backrest gives ergonomic comfort and support for any back shape. The lumbar support and backrest are individually pressure adjustable with one hand.

Well Designed & Healthy: The smart seat is slightly convex and comes equipped with the flexzone® - technology and so adjustment is provided without any pressure points. The breathable multi-zone comfort foam provides support and a healthy seating environment.

High Tech: The patented technology Swopper® encourages and supports changing sitting positions and harmonious 3D movements. And because the 3Dee adapts to the movements of the user, the back remains upright - even if you lean towards the desk.

## Benefits

- Helps relieve back pain
- Promotes active-dynamic sitting
- Good training for the muscles
- Keeps ligaments and joints in motion
- Stimulates blood circulation
- Encourages concentration & performance
- Patented Flexzone® technology in the seat with multi-zone integral foam padding
- 5 independent adjustments

## Features
